

# COBRA CONVEYOR

## FEATURES

- Operates quietly and without vibrations
- Requires minimal maintenance
- Features of a modular design
- Equipped with a metal-supported pallet
- Includes hardened sprockets
- Utilizes forged steel chains
- Offers spare parts and customer service

# COBRA CONVEYOR

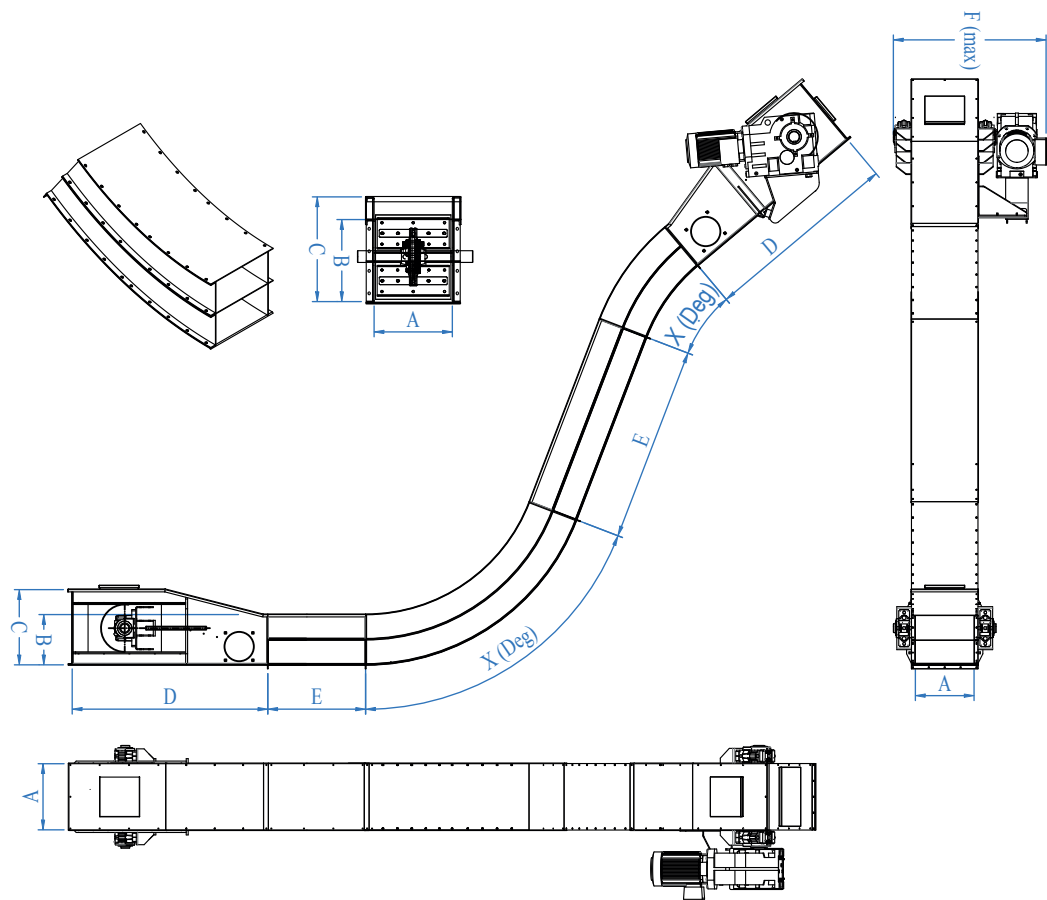

Cobra conveyors are used for **horizontal, vertical or inclined** transportation of powder and granular materials. They allow transport of as many products as you want at the desired angle and inclination in a safe and cost-effective way.

only resistant to extreme conditions but it also provides **easy access to hard-to-reach areas**. In addition, it ensures efficient use of space. What's more is that the drive, idler and intermediate sections are easy-to-install.

Paddles in the support chain prevent steel abrasion and ensure maximum performance. **The inclined chain conveyor** is not

## USAGE AREAS

- Raw Material Unit
- Grinding Unit
- Flake Units
- Feed Mills

MODEL	DIMENSIONS (mm)						REVOLUTION (rev/min)	SPEED (m/sec)	CAPACITY (m³/h)
	A	B	C	D	E	F			
CCS 250/420	250	420	540	1400	2300	700	36	0,5	45
CCS 420/420	400	420	540	1400	2300	900	36	0,5	45 - 75
CCS 600/500	600	500	775	2000	2300	1600	25	0,5	160

The calculation of capacity is determined by using an average turnover rate and a constant occupancy rate.
