## DOUBLE SHAFT RIBBON PADDLE MIXER

Double Shaft Ribbon Paddle Mixer is designed to homogenously mix variety of free flowing grinded materials with or without added liquids. The mix is prepared with 1 in 100,000 sensitivity. With the help of dual shafts, the total mixing time drops below two minutes.

Intake time is reduced by wide pneumatic hatch while the output is also reduced by end to end openable dual hatches. The saved time ensures higher capacity/hour values.

## USAGE AREAS

- Feed production facilities
- Flour factories
- Chemical facilities
- Premix facilities
