## HYDRAULICALLY ADJUSTABLE TWIN BELT TRUCK LOADER/UNLOADER

It's used to load/unload the vehicles with bagged or packaged products. The belt can load/unload the products from any desired height to a vehicle with the help of hydraulic adjustable height control which is available on both ends.

The rotating wheels (lockable) make it easier to move to the loading point. Belt lengths are customisable on demand.

## USAGE AREAS

- Feed mills
- Chemical plants
- Cement plants

MODEL	DIMENSIONS (mm)									
	A	B	C	D	E	F	L1	L2	H1	H2
