PREMIX AND MICRO DOSING UNIT

Weighing system consists of a steel construction. It has a powder absorption feature for eliminating dust coming out of the silos.

The screws that are used for dosing have a diameter of 100mm. There is a pneumatic slide on the output to prevent the products from flowing. It has a flexible design with the dosage scales. The sensitive weighing system in the dosing scales transports the product with pneumatic butterfly valves to the mixer.

AREAS OF USAGE

Used for dosing premix, vitamins and minerals.

MODEL	TYPE OF THE SILO	VOLUME	HEIGHT
MDS	Ø 550mm	250lt	1200mm
MDS	Ø 800mm	500lt	1200mm
MDS	Ø 1100mm	1000lt	1750mm
MDS	800x1000mm	1000lt	2000mm
MDS	1000x1000mm	2000lt	2500mm
MDS	1000x1200mm	6000lt	4000mm

MODEL	DOSING WEIGHER	VOLUME WEIGHING PRECISION
MDW	Ø 550mm	250lt
MDW	Ø 800mm	500lt
