

VIBRATING SIEVE

FEATURES

- High capacity
- Compact and light design
- Low energy costs
- Easy to assemble and use *
- Easy sieve change with wire fenced and frameless sieves
- Body doors ensuring easy maintenance
- Sieving in preferred sizes
- 1- 4 decks of sieve

* In electrical vibrators, power can be adjusted according to the condition of the process. In this way, a vibrator with high Newton power can supply the desired small vibration force.

VIBRATING SIEVE

Yemmak vibrating sieve helps the products to be separated according to their grain size, eliminate the foreign materials, and help the granule sized objects to enter the process with vibrated sieve technology and different sieve openings.

Vibrating sieves are usually machines that has robust construction and maximum screening capability. The sieve that vibrates with vibro engines, helps diversify the products in the preferred way.

AREAS OF USAGE

- Pellet units
- Raw material cleaning units
- Chemical industry
- Mining industry
- Food industry
- Biomass industry

MODEL	DIMENSIONS (mm)			MOTOR (kW)	CAPACITY* (t/h)	WEIGHT (kg)
	A	B	C			
LMVS 1000x1600 S	2570	1400	1830	0,75x2	10/25	1070
LMVS 1000x2500 S	3320	1400	2300	1,5x2	20/35	1580
LMVS 1200x1600 S	2570	1600	1830	1,1x2	15/25	1140
LMVS 1200x1600 D(30°)	2825	1600	2155	1,1x2	15/30	1450
LMVS 1200x1600 D(18°)	2985	1600	2055	1,1x2	15/30	1450
LMVS 1200x1600 T	2775	1600	2270	1,5x2	15/35	1550
LMVS 1500x1600 S	2560	1900	1900	1,1x2	15/30	1350
LMVS 1500x2500 S	3340	1900	2200	2,5x2	20/30	2200
LMVS 1500x2500 D	3700	1900	2650	2,5x2	25/30	2700
LMVS 1500x2500 T	3680	1900	2920	3,5x2	50/100	3300
LMVS 1500x2500 Q	3610	1900	3305	3,5x2	50/100	3750
LMVS 2200x4200 S	5250	2710	3300	6,1x2	75/125	5800

*Production capacity varies according to the wire sieve dimensions.
